Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 04 November 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 34, 35, 38-45 rejected under 35 U.S.C. 102(e) as being anticipated by Yamazaki et al.

With regard to claims 34, 35, 38-45, Yamazaki et al (US 6,384,427) disclose a method of manufacturing of a light emitting device, said method comprising steps of (col. 7, lines 8-19):

introducing gas from compressor into processing chamber;

pressurizing the processing chamber to pressure equal or higher than atmospheric pressure (col. 7, line 9);

forming EL layer.

With regard to claims 49-51, Yamazaki et al disclose a method of manufacturing of a light emitting device, said method comprising steps of :

introducing a substrate in a chamber;

making an atmosphere in the chamber containing a first solvent;

printing a luminescence material dissolved in a second solvent by a screen printing.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 2833

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 34-37, 39, 41-48, 50 are rejected under 35 U.S.C. 103(a) as being unpatentable over Porowski et al in view of Yamazaki et al.

With regard to claims 34-37, 39, 41, 46, 47, 48, 50, 52, 53, Porowski et al (US 6,329,215) disclose a method of manufacturing of a light emitting device, said method comprising steps of (col. 2, lines 44-53):

introducing gas from compressor into processing chamber;
pressurizing the processing chamber to pressure equal or higher than atmospheric pressure (col. 2, line 67);

forming EL layer.

Porowski et al do not disclose that EL layer being formed by printing.

Yamazaki et al disclose EL layer being formed by printing (col. 6 line 65 – col. 7, line 3).

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to print the EL layer on the Porowski et al substrate (instead of using vapor deposition method), as taught by Yamazaki et al, to utilize the Porowski method for polymer type organic EL.

With regard to claims 42-45, Porowski et al when modified by Yamazaki et al disclose a light emitting device selected from a group consisting of display devices (col. 1, lines 18-23).

Response to Arguments

Applicant's arguments with respect to claim 34, 46, 48, 49, 51 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH**

Art Unit: 2833

shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
